Compact Industrial PC

C-IPC

With the new „C-IPC“ industrial PC, SIGMATEK continues with consequence the development of the „compact“ DIAS series. The C-IPC therefore can be installed in small control cubicle or terminal boxes. The C-IPC is fully compatible with the existing DIAS series and provides integrated DIAS interfaces. In this way, the C-IPC can be plugged into the C-DIAS module carrier. The constructional form enables simple and easy handling in operation as well as for the installation of additional components.

The industrial PC is suitable for process control, visualization or for both tasks simultaneously.

Features:

- compact, space-saving design
- scalable power
- Compact flash memory card as an exchange medium
- standard interfaces
- Ethernet 10/100 Mbps
- USB
- S-DVI for the connection of a convenient operating terminal
- service-friendliness and simple handling
- monitoring functions
- can be plugged into the C-DIAS module carrier
- no processor fan (dependent on processor)
- optional with UPS

C-IPC

Technical data

Processor:	different types of processor available, from 733 MHz to 1,2 GHz
Interfaces:	Ethernet 10/100 Mbps, RS 232, RS 232 / 485, CAN bus, DIAS bus, S-DVI, USB, RGB
Mass storage:	Compact flash card
Power supply:	24 V DC
Operating temperature:	0 - 50 °C
